

LUNA is a discreet and attractive flying killer designed for industrial premises. Quick and easy maintenance with no exterior parts. The ideal solution for clean rooms.

The IP65 dust and moisture proof design makes the unit a perfect choice for food and pharmaceutical industries, hotels, cafes, restaurants, hospitals, schools, kindergartens, secondary and higher education establishments. The silent operation of the unit doesn't hinder performance. The attractive light diffused by the machine means it can also be used as a decorative lighting fixture, suitable for use in hospital wards etc.

The LUNA units are made of corrosion-resistant materials and can be installed directly over food preparation counters and storage racks.

LUNA insect killers come both with standard UV or shatterproof tubes, so they can be used within pharmaceutical factories and food production facilities.

Specifications

Model	Body color	Protection (m ²)		Information		UV tube, type
		Op.	Max.	Dimensions (mm) L x W x H	Weight (kg)	
Luna-15 W	White	90	270	550 x 200 x 300	2,8	Y615 T8L
Luna-15 S/St	Stainless steel	90	270	550 x 200 x 300	2,8	Y615 T8L
Luna-15 W = IP65	White	90	270	550 x 200 x 300	2,8	Y615 T8L
Luna-15 S/St = IP65	Stainless steel	90	270	550 x 200 x 300	2,8	Y615 T8L

Classic design

Original design, suitable for use in any room.

Extensive protection area

The Luna performs so efficiently due to openness of the glueboard, which attracts as many flies as possible.

Highly efficient UV tubes

The standard edition comes with standard UV tubes, but they can easily be replaced with unbreakable (shatterproof) tubes.

Rugged construction

There are two versions of the units: enameled steel (white) and food grade stainless steel. The units can also have special protection from dust and moisture (IP65).

Mounting options

The unit is typically mounted on a wall in a horizontal position, but it can also be fixed vertically. Mounting is simple and easy.

Glueboards

The glueboards for LUNA flying insect killers are produced by Fly Trap Commercial, the industry leader. The efficiency of these glueboards has been proven over dozens of years and they are rightfully considered the best available on the market.

YUTEC GB – glueboards.
Modern technological solution
Impregnated with pheromone, covered
with non-drying glue.

KILLS
ABSOLUTELY ALL FLYING INSECTS:
FROM SMALL MIDGES TO CHAFER
AND LOCUST

Easy cleaning and maintenance

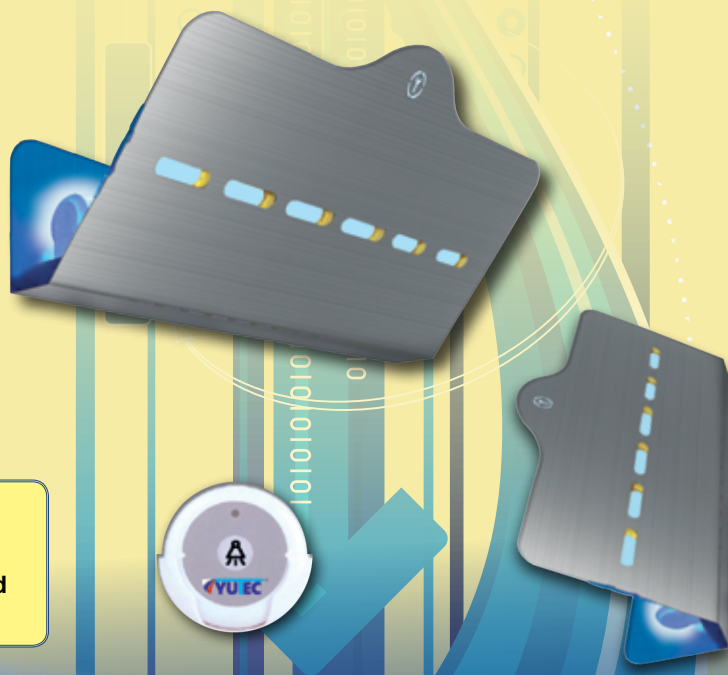

The only maintenance required is timely replacement of the glueboards covered with killed insects. With LUNA, this operation takes 7 seconds and does not require dismantling the unit.

Quality certificate

Complies with Euro standards, SanPin and GOST-R.

Reliability

Guaranteed service life of at least 3 years.

The special pheromone-impregnated glueboard attracts and unfailingly kills insects such as midges, mosquitoes, flies, wasps, moths, horseflies, whiteflies, fungus gnats, chafar, locust, tobacco beetle, carabus, etc.
